

DATA SHEET

Shop shears

Light weight, strong shears available in 5 sizes

■ DESCRIPTION

Our Shop shears are lightweight (1/2 the weight of other shears) and stronger than most all metal shears. The Shop shears have larger handles to reduce stress and thicker blades for heavy duty cutting. Serrated edges are available at an additional charge. Fabricated from 440C stainless steel throughout handles for strength, Shop shears are one of the hardest and smoothest cutting shears available, with approx. 60 HRC, hardened throughout.

Other advantages are: 45 ° honed cutting edge, soft santoprene inserts to cushion your hands and double-locking nuts for strength.

■ SIZES

Product reference	Type	Length	Weight
SS - 8	Straight shears	20 cm	150 g
SS - 9	Straight shears	23 cm	170 g
SS - 10	Straight shears	25 cm	210 g
